

🌟 Exciting News from GroDev Solar Solutions! 🌟

We're thrilled to announce the commencement and successful completion of a groundbreaking project aimed at enhancing our energy independence and reducing energy costs. Stone Stamcor partnered with GoDev to implement a state-of-the-art solar solution that aligns with our sustainability goals and ensures resilience against future grid challenges.

🔧 From the initial planning stages to the meticulous installation of over 500 cutting-edge solar panels, 300kW of advanced Sigenergy inverters, and 386kWh of state-of-the-art Lithium Batteries, every step of this journey has been driven by our commitment to efficiency and sustainability.

🎉 Today, we celebrate the successful conclusion of this project, which not only lowered our electricity costs but also strengthened our dedication to sustainable practices. Thank you to everyone involved for their expertise and dedication in making this milestone possible.
